

FLY SCREEN MESH

Our fly screen mesh is manufactured from fibreglass coated in PVC. The strands are ultrasonically welded to securely lock them together. This gives a very strong mesh which is very durable for day to day usage and is totally rot proof for use in building structures.

SPECIFICATION

Construction - fibreglass / PVC ultrasonically welded

Density - warp 18 / weft 16 (18 / 16 threads per inch), approx 66% openness factor.

Weight - grams per sq mtr / ca. 12g +/- 10%

Thickness - ca 0.29mm +/- 0.05%

Resistance to Temperature -35c to +80c

The mesh is available in 30mtr x 1.2mts wide rolls in black or grey, 1.8mtr wide rolls are available by special order. The mesh can be supplied slit to any width for use on soffit vents etc.
