FIXED, HINGED OR MAGNETIC SCREENS

These screens have aluminium frames finished in white polyester coating for ease of cleaning. There are options of having the screens hinged, at the top or sides, magnetic fixings and mid cross bars for adding strength to longer lengths.

The frame is 30mm wide and 9mm deep, mesh is available in Grey, Black, Sand or Green. The components slot together easily and the mesh is held in place by the rubber gasket. The screens are available ready made or as kits.

The hinges and turn buttons will add an additional 18mm each to the overall dimension.
